

DUDGEON

SINCE 1947

Cinema Four Seater

A rather entertaining design for a large - award winning - superyacht built recently at Lurssen in Germany. The armchair seats have a big slope front to back so that the owner and his guests were able to remain sitting comfortably whilst looking up at the cinema screen. There were also headrests that folded down to maximise individual comfort. The side tables were covered in saddle stitched red leather. We made almost all of the upholstery for this boat - the FOURTH superyacht which Dudgeon has made all or most the upholstery for.

This photo was taken 'in progress' before the arm cushions were put on.
